Broadway and 156th Street,  
New York, N. Y.

Gentlemen:-

The Chemists Club publishes monthly its paper the "Percolator", and it has been influential in drawing members to the City for certain events which have been shown as forthcoming. Members now inquire about future events and have asked us to give more information upon this score. Since artistic and cultural interests dominate among the members of the Club, we should like to include advance statements for the months of March, April and May of what is to take place in your Exhibition Halls during that period. Will you kindly, therefore, advise us, preferably before the end of this week or early next week, when the next issue of the "Percolator" does to press, what events you will have during the three months mentioned; and we hope that it will convenient to you to send us monthly, preferably between the 15th and 20th, lists of the exhibitions or other interests which you will have, and if there are any National Meetings of Societies to take place at your building, we shall be glad to know about them as well.

Kindly address your communication to the attention of the writer at 141 East 36 Street, New York.

Very truly yours,

  
Charles G. Roth,  
Special Publication Committee.

New York City

Attention of C. F. Roth

Dear Sir:

In reply to your letter of the 16th, our Museum has been closed to the public for quite some time on account of the building of an addition which has only just been completed. We are now working on the arrangement of exhibitions, and this, of course, will take considerable time. It will probably be fall before we are quite ready. At such time we will notify you.

Yours very truly,

Curator.
